

New Kits for Large range (730 kVA - 2500 kVA) Diesel Generator sets

Available to Order now !!!

We are pleased announce the release of a new modular range of single cylinder kits for generator sets powered by 4000 Series diesel engines from year 2000 onwards.

Benefits:

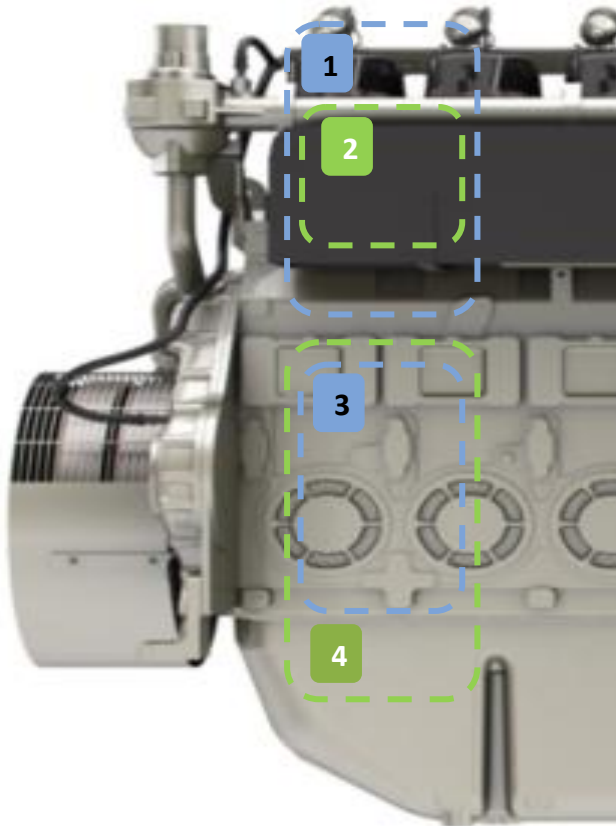

1. Complete single cylinder repairs or combine for complete engine overhaul
2. Kit structure designed to minimise duplicate high value parts
3. Specify the exact kit required for your service or overhaul task including
 - a. Cylinder head replacement
 - b. Cylinder head overhaul
 - c. Single cylinder overhaul (replace piston or simply re-ring)
4. Add additional parts to increase build list coverage even further or enable you to use the kits on pre-2000 engines
5. Cost effective solution compared to buying individual parts
6. Saves you time when specifying and ordering parts

Range Contents:

- 4 Top gasket kits – all the parts required to remove and refit a cylinder head
- Overhaul kit – all the parts required to complete a piston, ring and liner replacement
- Overhaul re-ring kit – liner and piston rings for a more cost effective overhaul
- Valvetrain kit – valvetrain components, including the latest 20 degree valves and seats, for cylinder head overhaul

Genuine Parts

1 Top gasket kit

- Head gasket, exhaust / induction gaskets, rocker cover gasket, seals, etc.
- Cylinder head replacement

2 Valvetrain kit

- Valves, guides, seats, springs, tube, injector washer
- Upgrade to 20 degree valves
- Cylinder head overhaul

3 Overhaul re-ring kit

- Piston rings, cylinder liner, gaskets & seals, conrod bolts
- Overhaul cylinder, re-ringing existing piston

4 Overhaul kit

- Piston, piston rings, cylinder liner, gaskets and seals, conrod bolts
- Overhaul cylinder pack
